

JOURNAL OF THE AUSTRALASIAN CERAMIC SOCIETY

J. AUST. CERAM. SOC., VOLUME 35, NUMBER 1/2, (1999)

- 1 Chemical Compatibility of Rare Earth Cobaltite Perovskites with YSZ
H. Y. Tu, X. H. Lu, T. L. Wen, Y. Takeda, T. Ichikawa, N. Imanishi and O. Yamamoto
- 7 The Formation of Zirconium Hydroxide Nanoparticles from Aqueous Nitrate Solutions
P. D. Southon, J. R. Bartlett, K.S. Finnie, J. L. Woolfrey, B. Ben-Nissan and G. S. K. Kannangara
- 13 Analysis of the Particle Growth in Silane PCVD Reactor for Semiconductor Processing
K.-S. Kim and D.-J. Kim
- 19 Aesthetical Durability and Designing Products Made by Waste materials
D. Sevelius
- 28 Thermal Evolution of Mullite from Gel Precursors Studied by Mass Spectrometry and MAS NMR
K. J. D. MacKenzie, R. H. Meinhold, J. A. Patterson, H. Schneider, M. Schmucker and D. Volls
- 34 A Solid State MAS NMR Study of the Thermal Reactions in Alkali-Leached Aluminosilicates
K. J. D. MacKenzies, R. H. Meinhold, A. K. Chakravorty and M. H. Dafadar
- 39 Solid State MAS NMR Studies of Rare Earth Melilites
K. J. D. MacKenzie, T. C. Ekstrom, R. H. Meinhold, P.-L. Wang and Z. Shen
- 45 Cement Workshop at Austceram 98
L. P. Aldridge, T. O. Mason, N. B. Milestone, A. S. Ray and K. L. Turner
- 47 Possibilities of Mineralising Cement Clinker using Alumina Industry Waste
W. South, T. Hunt and I. Hinczak
- 56 Alkalis in Concrete: Where Do They Come From and What Effects Do They Have?
N. B. Milestone, R. L. Goguel, D. A. St John and S. A. Frietag

- 62 Evaluation of Phases in Hydrothermally Cured CaO-SiO₂-H₂O and CaO-Al₂O₃-H₂O System
D. S. Klimesch and A. Ray
- 69 Determination of Chloride Ingress rate for Reinforced Concrete Design Life Prediction
D. H. Chisholm and N. P. Lee
- 73 Diffusion of Ions through Cement Paste
W. K. Bertram, P. Rougeron and L. P. Aldridge
- 79 Thoughts on a Durability Prediction Methodology for Concrete in the Marine Environment
N. P. Lee and D. H. Chisholm
- 87 Concrete Durability How to make a Reactive material Last a Lifetime
N. B. Milestone
- 96 Can Concrete be Made Better?
I. Hinczak, K. Turner and I. Dumitru

COVER PICTURE: Transmitted light micrograph (cross-polarised) of a sample of ancient Roman cement, showing aggregates. Photo taken by John Warmeant of ANSTO, Materials Division, Sydney.
